

More Power. More Fun. More winning.

Once you've ridden the YFM700R there's no turning back. Its thrilling power and precise handling ensure adrenaline-charged action on all types of terrain. And once you're hooked, this mighty ATV will transform your leisure time forever.

The gutsy 686cc 4-stroke engine comes with a series of features that boost power for fast acceleration. And with its efficient fuel consumption, the model takes you further between refills.

Built for racers, the YFM700R Special Edition comes packed with a range of exclusive parts including a high compression head, special cam and race-bred fuel mapping. And with its piggyback shocks and 22-inch Maxxis tyres, the YFM700R SE is built to win.

- ▶ High-tech race-bred 686cc fuel-injected engine
- ▶ High performance with efficient fuel consumption
- ▶ Strong, lightweight hybrid aluminium/steel frame
- ▶ Rear shock gives comfort and control
- ▶ Low-pressure gas front shocks for easy adjustment
- ▶ Large 22-inch front tyres
- ▶ Aluminium components for reduced unsprung weight
- ▶ 5-speed transmission with reverse - easy shifting
- ▶ Informative easy-to-read LED instrumentation
- ▶ Push-button electric-start for convenience
- ▶ Sleek bodywork with comfortable riding position
- ▶ Built without compromise

Yamaha Leisure ATVs

Exploration, excitement and fun for every rider. That's what we aim to bring with the YFM700R. And for racers we've created the ultimate track weapon with the YFM700R SE.

Whether you're a long-distance adventure seeker who wants unmatched comfort on the trail - or an experienced racer looking for cutting edge technology with winning performance - Yamaha have a model that's right for you.

Our 686cc 4-stroke engines combine class-leading power with legendary durability and exceptional reliability - so whether you're enjoying the countryside with your friends or fighting for the lead on the race track, Yamaha have the ATV that's right for you.

High power, big torque

Yamaha 4-stroke ATVs provide high levels of torque even at low rpm that ensures terrain-hugging traction, even in difficult conditions. The YFM700R's engine produces high levels of power and torque - and its fuel injection system gives increased fuel economy and reduced emissions.

Extra-strong hybrid chassis

For the kind of strength that withstands every knock and bump, the state-of-the-art hybrid chassis combines a steel front section with an aluminium rear section and a detachable subframe. And for comfortable and controllable handling, there's a lightweight cast aluminium swingarm operating an adjustable shock with optimized damping settings.

5-speed transmission with reverse

To optimize the remarkable performance potential of the high powered engine, the YFM700R drives through a slick-shifting 5-speed transmission. Whatever the terrain, this durable gearbox and smooth multiplate clutch give you total controllability - while the reverse gear gives added manoeuvrability in tight situations.

Adjustable suspension

The long-travel front suspension is set up at the factory to deliver a smooth and confidence-inspiring ride on all types of surfaces. With optimized damping settings, the rear suspension system gives a relaxing ride and ensures high levels of traction - and the large diameter 22-inch front tyres soak up the bumps to give improved comfort.

Lightweight aluminium wheels and calipers

Aluminium wheels and compact calipers contribute to the YFM700R's low unsprung weight that ensures responsive suspension characteristics. Operating on ventilated discs, the 2-piston front brake calipers - combined with the YFZ450R-type 2-piston rear caliper - deliver smooth and controllable stopping power for riding confidence.

Ergonomic design

Piloting an ATV is a fun, physical activity that uses unusual combinations of muscles. Yamaha ATVs are designed to be straightforward to use, and comfortable for the widest possible range of body shapes and sizes. The front end design gives plenty of knee clearance for improved body movement, while retaining the aggressive, streamlined YFM700R styling.

<i>Engine</i>		<i>YFM700R / SE</i>
Engine type	Single cylinder, liquid-cooled, 4-stroke, 4-valves	
Displacement	686cc	
Bore x stroke	102.0 mm x 84.0 mm	
Compression ratio	9.2 : 1	
Lubrication system	Dry sump	
Fuel system	Fuel injection, 44 mm	
Ignition system	ECU	
Starter system	Electric	
Transmission system	5 speed & reverse, wet multiplate clutch	
Drive system	2WD	
Final transmission	Sealed O-ring chain, eccentric adjustment	

<i>Chassis</i>		<i>YFM700R / SE</i>
Front suspension system	Independent double wishbone, threaded preload adjustable spring, 3-way adjustable damper, 230 mm wheel travel	
Rear suspension system	Cast aluminium swingarm, threaded preload adjustable spring, 3-way adjustable damper, 256 mm wheel travel	
Front brake	Dual ventilated disc with hydraulic twin piston callipers	
Rear brake	Ventilated wave-type disc with hydraulic callipers	
Front tyres	AT21x7R10	
Rear tyres	AT20x10R9	

<i>Dimensions</i>		<i>YFM700R / SE</i>
Overall length	1,845 mm	
Overall width	1,170 mm	
Overall height	1,130 mm	
Seat height	815 mm	
Wheelbase	1,280 mm	
Minimum ground clearance	113 mm	
Wet weight (including full oil and fuel tank)	192 kg	
Fuel tank capacity	11.0 litres

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range.

Yamaha also recommends the use of Yamalube®, our own range of high-tech lubricants - the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you ride.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:
