⁽¹⁾ The maximum payload rating has been calculated according to ISO standards. Operating at or near maximum payloads is only advised in calm water and at reduced speeds.

(2) The spread of engine sizes corresponds to the efficient use of the boat with an average load. The minimum power is exploitable in relaxed activities, such as fishing, while the maximum recommended power is destined for performance activities such as water-skiing. For additional information all Zodiac boats from 10'2"/3.10 m to 13'9"/4.20 m can plane with 2 people on board (total load of 310 lbs/140 kg) using only a 6-8 Hp/5-6 kW outboard. (3) Where the boat is fitted with an engine that exceeds Zodiac's maximum recommended power it must be treated with extreme care. This application is directed at experienced users using their boats for very specific

purposes (carrying heavy loads, etc.). The capacity plate shows the maximum allowed power. In no case shall the boat be fitted with an engine that exceeds this power.

[4] Maximum authorized weight: Dry weight, according to engine manufacturers catalogue's specifications. Where the boat is fitted with an engine that exceeds Zodiac's maximum recommended power it must be treated with extreme care. This application is directed at experienced users using their boat for very specific purposes (carrying heavy loads, etc.). The capacity plate shows the maximum allowed power. In no case shall the boat be fitted with an engine that exceeds this power.

⁽⁵⁾ Maximum speeds are given only as a general guide to understanding boat performance. They have been established by experienced professional pilots in ideal navigating conditions with one person aboard.

Boat speeds all given only as a general galactic indestanding boat performance. They have been established by experienced professional pilots in lideal navigating conditions with one person about.

[7] Long shaft for twin engine installation.

^{(8) 2} x 80 Hp / 59 kW for twin engine installation. (9) 2 x 175 kg / 385 lbs for twin engine installation.

^{(10) 2} x 225 Hp / 168 kW for twin engine installation. (11) 2 x 272 kg / 600 lbs for twin engine installation.

⁽¹²⁾ Shaft XL for twin engine installation.

EQUIPMENT LIST					
HOLL	BUOYANCY TUBE	STANDARD EQUIPMENT	MAIN OPTIONAL ACCESSORIES		
Deep-V fibreglass hull	Removable tube system	Reclining steering console cylinder (550 / 650)/ fixed (850) with :	Removable bolster back (550 / 650)		
Moulded non-skid deck	• Sharc™ Duotex™ 2 x 1100 decitex fabric (650 / 850)	- Steering + steering system + steering cable (550) - Hydraulic steering (650 / 850)	Canvas hood
